NewWave Communications Signs with Comporium Security Dealer Program

ORLANDO, Fla. – TelcoTV '09 (Nov. 12, 2009) – NewWave and **Comporium** are pleased to announce that NewWave has joined the Comporium Security Dealer Program. This will expand NewWave's communications services, which include the Triple Play of Internet, television, and telephone services. **NewWave** is the nation's 27th largest cable TV provider with operations in six states.

"Comporium provides a unique combination of start-up support and industry contacts with innovators like **uControl**," said Larry Eby, senior vice president of operations for NewWave Communications. "We want to provide our customers with a range of security services from intrusion monitoring to smoke detection to the futuristic remote home and family management features provided by the uControl SMA Platform."

Comporium recently announced that it has added uControl's Security, Monitoring and Automation (**SMA**) Platform to its suite of security services. uControl's award winning solution pairs its open, technology agnostic software infrastructure with the industry's only "All-In-One" SMA TouchScreen from SMC Networks - combining an alarm system, communications gateway and home automation platform into one device. The SMA Platform enables Broadband Service Providers to deliver the next generation of services for the Connected Home.

Comporium's Security Dealer Program shows innovative service providers how to break into the profitable home security industry. In addition to wholesale security monitoring through Comporium's UL® approved Central Station, the Dealer Program also provides technical support, training for sales and service technicians, and "**customize and go**" marketing campaigns to ensure success.

"We welcome NewWave to our Dealer Program," said Dan Lehman, general manager of the Comporium Security Dealer Program. "Our dealers report that security services complement both cable television and telephone services while leveraging their existing assets to expand company revenue. Our partnership with uControl expands the range of security services in our program. uControl's platform allows us to immediately offer a future-proof, IP-enabled home security solution that bridges to other Connected Home services like energy management, video monitoring and much more."

About NewWave Communications

NewWave Communications is a cable television, high-speed Internet, and digital telephone service provider serving Arkansas, Illinois, Kentucky, Missouri, South Carolina and Tennessee. Our goal at NewWave Communications is to ensure our customers are provided with the best products and services at an affordable price. Visit www.newwavecom.com for more details.

About uControl:

uControl is a leading provider of next-generation home security and automation solutions. The uControl Home Security, Monitoring and Automation (SMA) Platform enables Broadband Service Providers to deliver the next generation of services for the Connected Home. uControl's award winning solution pairs its open, technology agnostic infrastructure with the industry's only "All-In-One" SMA TouchScreen combining an alarm system, communications gateway and home automation platform into one device. Beyond home security, the uControl SMA Platform delivers the next generation of energy management, home health monitoring and Connected Home services that customers will demand.
